

Sublime Horse Exerciser

18 meter 6 horses

18 meter 6 horses / Article no. 22-5-20-00618

A high-quality, technologically advanced design. Equipped with extra thick support arms and a sleek central drive unit with safety coupling including cover. The horse exerciser is standard equipped with various safety features such as the lightweight, impact-resistant horse-friendly drift fences. The walk / trot box ensures a controlled training gait for your horse. By means of the 2-position switch you can choose to walk or to walk and trot.

- ✓ Including shock preparation
- ✓ Electronic braking system
- ✓ Direct drive
- ✓ Safety coupling
- ✓ Silent during operation
- ✓ Various safety features
- ✓ Low maintenance
- ✓ CE mark
- ✓ Extra heavy duty

Characteristics

Safety:

The Sublime horse exerciser is designed to train your horses as safely as possible and include equipped with a direct drive with a safety break coupling, lightweight impact-resistant horse-friendly drift fences and electronic overload adjustment. All dangerous moving parts are protected against contact. The drift fences are suspended in specially developed brackets that ensure that a horse cannot get stuck on a drift fence.

Durability:

By using high-quality industrial parts, we can ensure a very long service life guarantee. Due to a technologically advanced design, the exerciser turns almost silently and very lightly, this makes the Q-line® horse exercisers particularly energy efficient. The Sublime has a cover on the rotating part to protect it against the elements.

External characteristics:

The designs of the horse exerciser aim for a compact and minimalist appearance. The drive section of the exerciser is protected against contact. The drift fences are suspended at a height of 2 meters and made of an aluminum cross bar containing 10 x 1.6 meter long impact-resistant plastic tubes wrapped with a stainless steel spring for electric shock conduction.

Maintenance:

The Q-line® exercisers are very solidly constructed and require very little maintenance. Through the technologically

advanced design and the materials used, there is virtually no wear or corrosion, so maintenance is minimized.

Quality marks:

All horse exercisers comply with the machine directive 2006 / 42EG and are provided with the correct quality marks as standard the Q-line® horse exercisers are certified according to the NEN 3140 and ARBO guidelines and meet all European safety requirements.

Control:

The walk-trot box supplied as standard fulfills the need to train the horses daily.

The waterproof box is equipped with:

- 1 main switch
- 2 position switch to choose between walking and trotting.
- 2 potentiometers for the speeds to be set
- 3 position switch to set the turning time - 5/10/15 minutes
- 1 switch to guide the horses in and out of the exerciser
- 2 position switch to let the horses walk only left or only right
- * optional electric current control switch

Passage 18 meters 750N

Specifications

Diameter	18 meter
nr of horses	6
Drive system	2,3 meter
Width	Walk way 2,5 meter
Speed	16 kmh Adjustable
Time	Adjustable 5/10/15 minutes
Drive system	Direct drive
Secure	Break coupler
Electronic brake	yes, adjustable
Included	Shock preparation
Power supply	230 Volt, 50 Hz
Power usage	1000 Watt
Fuse with	16A
Ampere	10A
IP rating	54
Quality mark	CE / NEN3140 / OHS
Drift Fence	Aluminium with safety rods
Suplied as standard	Control box WCB 2.1
Cable length	Motor cable 14 meter
Basic material	Galvanized steel NEN-EN-ISO 1461-99.
Fixings	Included
Transport size	1 pallet 300cm x 80cm x 150cm
Transport weight	743 KG
