

# Roller treadmill

## Treadmill for horses

Roller treadmill / Article no. 27-5-00-00230

The roller treadmill is, as the name implies, equipped with rollers. The micro rollers have a very positive effect on the blood circulation of the horse's hoof. Because there is less friction between the belt and the rollers than with conventional treadmills, no heat is generated in the belt, so there is no heat transfer to the hooves. In addition, the life of the rubber band is considerably extended due to less resistance.

The roller treadmill is equipped with start-up and brake electronics, an electronic emergency stop unit, two ramps with anti-slip mat, drum-drive with mechanical brake, an infrared light gate, 2 locking rods with panic lock and two high stable side walls. The sturdy side walls are provided with transparent unbreakable carbonate plate. All steel parts are galvanized and / or powder coated as standard.

The positive effect of treadmill training on the horse's endurance is appreciated in all disciplines of equestrian sports and ensures an improvement in the build-up of the fore and hindquarters muscles.

The treadmill provides controlled training for your horse, ideal for rehabilitation or targeted muscle training. The Treadmill Trainer is designed and built to the highest standards with safety for the horse first.

- ✓ IR trip fence
- ✓ User friendly
- ✓ Easy to install
- ✓ Smooth side walls
- ✓ Various safety features
- ✓ Low maintenance
- ✓ 230V / 2,2Kw

## Characteristics

### Safety:

The Q-line® treadmills can only move in height when the motor is on. This prevents the horse from walking uncontrolled and thus falling. If a malfunction occurs in the treadmill, the height adjustment is automatically reset and returns to the horizontal position.

### Durability:

By using high-quality industrial parts, we can guarantee a very long lifespan. Thanks to a technologically advanced design, the belt glides almost silently and very lightly, making the Q-line® treadmills particularly energy-efficient.

**Appearance:**

The treadmill trainer is a well thought-out technological solution and is characterized by the flexible bottom and solid construction. In which a running quality is obtained that is comparable to a natural soil.

**Lifespan:**

Q-line® treadmills are made of high-quality material. The drum motors in the treadmills are water and dust proof and are therefore considerably less sensitive to malfunctions. Thanks to a completely galvanized construction, the Q-line® treadmills can also be used outdoors.

**Maintenance:**

The treadmills require very little maintenance. Due to the technologically advanced design and the materials used, there is virtually no wear or corrosion, which minimizes maintenance.

**Quality mark:**

All treadmills comply with the machine directive 2006 / 42EG and are provided with the CE mark as standard. The Q-line® mills are also certified ex works according to the NEN 3140 and ARBO directive and therefore meet all European safety requirements.

## Accessory

Manual incline

Programmable incline

## Specifications

<b>Drive system</b>	Drum motor
<b>nr of horses</b>	1
<b>Suited for</b>	Horses up to 800 kg
<b>Secure</b>	Infra red fence / Mechanical break
<b>Speed</b>	10 km / h manually with potentiometer
<b>Other</b>	Side wall: polycarbonate
<b>Supplied as standard</b>	Ramp at the front and rear
<b>Optional</b>	Height adjustment
<b>Basic material</b>	Steel
<b>Colour</b>	Zinc or powdercoating RAL xxxx
<b>Length</b>	Walkway 342 cm / total 650 cm
<b>Height</b>	214 cm
<b>Width</b>	135 cm
<b>Thickness</b>	31 cm
<b>IP rating</b>	55
<b>Quality mark</b>	CE
<b>Power cord</b>	230/240V L-N-PE
<b>Power supply</b>	230/240V 50/60 Hz
<b>Power usage</b>	4KVA
<b>Ampere</b>	21
<b>Fuse with</b>	25A
<b>Transport weight</b>	1750 kg
<b>Transport size</b>	380 x 140 x 220 cm
